World Press Photo Exhibition 2017

July 21 to August 13, 2017
Barney Danson Theatre | Free

World Press Photo is a photo exhibition that inspires an understanding of the world through creative and quality photojournalism. This year, the exhibition contains 152 photographs that represent images of everyday life and headline news, including those captured during recent and ongoing conflicts. The photographs build upon the Museum's own exhibitions about post-Cold War conflict, and underline how these events continue to shape the world.

This exhibition is developed and circulated by World Press Photo, and is presented at the Canadian War Museum in partnership with the Embassy of the Kingdom of the Netherlands.

The World Press Photo Foundation receives support from the Dutch Postcode Lottery and is sponsored worldwide by Canon.

The Fenians — Irish-American veterans of the American Civil War — hoped to conquer Canada and trade it for Irish independence from Britain. Instead, Britain's North American colonies united against them in mutual defence, thereby contributing to the achievement of Confederation. Twenty-three rare and historical watercolour paintings portray the battles of Ridgeway and Fort Erie, where Fenian invaders clashed with Canadian militia.
